Summary

A tech enthusiast in the journey of exploration and lifelong learner. I embrace new challenges, love coding, and strive to use my full potential, detail-oriented, adaptive, helpful.

Education

- **Vivekanand Education Society's Institute of Technology** — Mumbai
  Bachelor of Engineering in Computer Science – 9.35 CGPA (Sem 5) — *2023 – 2027*

Projects

- **NaviBus – Real-Time Bus Tracking Backend System** [Link]
  Developed mobile application using **Flutter and Dart** with backend built on **Django**. Integrated **Map APIs** and built **REST APIs**. Processed **NMMT datasets** and optimized routing.
- **Forensodont** [Link]
  Built backend pipeline using **Python, OpenCV and Machine Learning**. Containerized using **Docker** and deployed with **GitHub Actions**.
- **Ashray** [Link]
  Developed fullstack platform using **Node.js, React.js, REST APIs and MongoDB**. Built scalable backend and deployed using **Docker**.
- **Healthcare Repository System using E-Card (Hyperledger Fabric)** [Link]
  Developed distributed backend using **Hyperledger Fabric, Node.js and REST APIs**. Deployed Fabric network using **Docker and Docker Compose**.

Experience

- **VESIT — Computer Vision and Backend Engineering Intern** — Mumbai
  May 2025 – July 2025
  - Developed backend services using **Python and REST APIs**
  - Built **ETL pipelines** for automated data ingestion and processing
  - Improved system reliability through modular design and efficient data workflows
- **VESIT — Blockchain Software Engineering Intern** — Mumbai
  Nov 2024 – Jan 2025
  - Developed distributed backend systems using **Node.js and Hyperledger Fabric**
  - Designed and deployed **REST APIs** using containerized environments with **Docker**
  - Debugged distributed components in **Linux** environments, improving system stability
- **Global Hackathons — Software Engineering Contributor (6x Winner)** — Various
  2024 – Present
  - Won **6 hackathons** by building production-ready systems using **AI, Agentic AI, Blockchain, and Machine Learning**
  - Developed solutions in domains including **sustainability, fintech, healthcare, and social impact**, aligned with **UN SDGs**
  - Collaborated in cross-functional teams, practiced rapid prototyping, system design, debugging, and deployment

Skills

Languages: Java, Python, JavaScript, C, SQL, Groovy
Frameworks: Node.js, Express.js, Django, REST APIs
Databases: MongoDB, PostgreSQL, MySQL, SQLite
Cloud/DevOps: AWS, GCP, Docker, Jenkins, GitLab CI/CD
Systems: Linux, Operating Systems, Networking
Concepts: Distributed Systems, Computer Networks, DSA, OOP
Tools: Git, GitHub, GitHub Actions, Linux CLI

Achievements

6x Hackathon Winner creating impactful software solutions
2 Star CodeChef Competitive Programmer
Selected Participant, ETHGlobal – Built distributed blockchain applications
Research Paper under review on AI-based forensic pipeline
